

**Come and join us for our next meeting**

# **Norfolk Butterflies**

## **Francis Farrow**

Discover Norfolk's butterflies – all 37 (plus some extras that could become permanent residents). After last year's disastrous butterfly showing what will 2025 season bring? Learn to recognise and locate our Norfolk species, their habitats and their larval food plants. Enjoy the butterfly year as it unfolds and each species emerges in turn to take its place in the natural world.

Francis has been the Honorary Warden of Beeston Common SSSI / SAC for over 20 years and actively manages the habitats for butterflies and other insects. Some 35 butterfly species have been recorded from the Common – that's over half the UK list!

**Monday 31st March 2025 7.30pm**

Friendship Hall, Cawston Road, Aylsham,  
NR11 6DS

Subscription Annual £20. VISITORS are always welcome £5
